

RECEIVED

Serial No. 08/904,855

DEC 31 1998

Group 2700

same system in an integrated fashion.

However, as required by the Examiner, applicant hereby elects, with traverse, Invention I represented by claims 1-12, 54-63, 65 and 81-90 to be examined.

In addition, applicant hereby preliminarily amends the above-identified patent application before its examination on the merits as follows:

IN THE SPECIFICATION: /

page 31, line 15: delete "complete" and substitute therefor --completely--.

IN THE CLAIMS

Amend claim 12:

1 12. (Amended) The system of claim 1 wherein said
2 component includes an audio system component.

Cancel claims 13-53, 64, 66-80 and 91.

Amend claim 54:

1 54. (Amended) A system for adjusting an item
2 included in a vehicle comprising:
3 a display for showing thereon an indicator
4 associated with the item; and
5 an interface for moving the indicator on the
6 display to adjust the item associated therewith, an
7 extent to which the item is adjusted being a function
8 of [proportional to] an extent to which the indicator
9 is moved.

Amend claim 60:

Claim 60, line 5: after "concerning" insert --at least--.

Amend claim 62:

Sub C6
B3

1 62. (Amended) A system for use in a vehicle
2 comprising:
3 a processor [first interface] for programming a
4 plurality of groups of sources providing entertainment,
5 each group of sources being associated with a
6 respective one of a plurality of locales;
7 an [a second] interface for presenting a first
8 group of sources associated with a first locale which
9 the vehicle is in; and
10 a mechanism for determining whether a current
11 location of the vehicle is within a predetermined range
12 of a second locale [detecting a change of a location of
13 the vehicle from the first locale to a second locale],
14 a second group of sources associated with the second
15 locale being presented when it is determined that the
16 current location of the vehicle is within a
17 predetermined range of the second locale [in response
18 to the change].

Amend claim 65:

Claim 65, line 3: delete "the steps of".

Amend claim 81:

Sub C8
B4

1 81. (Amended) A method for use in a system for
2 adjusting an item included in a vehicle, the system
3 including a display, comprising [the steps of]:
4 showing on the display an indicator associated
5 with the item; and
6 moving the indicator on the display to adjust the
7 item associated therewith, an extent to which the item
8 is adjusted being a function of [proportional to] an

B4
end
9 extent to which the indicator is moved.

Amend claim 87:

1 87. (Amended) A method for use in a system in a
2 vehicle comprising [the steps of]:
3 receiving a signal from each of a plurality of
4 sources providing entertainment[,];
5 deriving, from the received signal, information
6 concerning at least the type of entertainment provided
7 by the source; and
8 presenting indicators representing respective ones
9 of the plurality of sources, each indicator being
10 selectable to receive entertainment from the source
11 represented by the indicator, the indicators being
12 arranged according to the types of entertainment
13 provided by the sources represented thereby.

Amend claim 89:

B6
Amend
C10
1 89. (Amended) A method for use in a system in a
2 vehicle comprising [the steps of]:
3 programming a plurality of groups of sources
4 providing entertainment, each group of sources being
5 associated with a respective one of a plurality of
6 locales;
7 presenting a first group of sources associated
8 with a first locale which the vehicle is in; and
9 determining whether a current location of the
10 vehicle is within a predetermined range of a second
11 locale [detecting a change of a location of the vehicle
12 from the first locale to a second locale], a second
13 group of sources associated with the second locale
14 being presented when it is determined that the current

15 location of the vehicle is within a predetermined range
16 of the second locale [in response to the change].

*B6
enc*
[Add claim 92:]¹⁹

B7
1 --92. The system of claim ¹³54 wherein the
2 interface includes a device for directing the
3 indicator.--

[Add claim 93:]²⁹

1 --93. The system of claim ¹³54 wherein the
2 interface includes a touch-screen capability.--

*Sub
C11*
[Add claim 94:]¹³

1 --94. The system of claim ²²61 wherein the types of
2 entertainment include types of music.--

[Add claim 95:]²⁴

1 --95. The system of claim ²¹60 wherein the
2 information also concerns an identity of the source.--

[Add claim 96:]²⁵

1 --96. The system of claim ²¹60 wherein at least one
2 of the indicators indicates a status concerning whether
3 the at least one indicator has been selected.--

[Add claim 97:]¹⁶

1 --97. The system of claim ²⁵96 wherein the status
2 is indicated by a first color if the at least one
3 indicator has been selected, and by a second color if
4 the at least one indicator has not been selected.--

Sub C12
[Add claim 98:]

1 --98. The system of claim 62 wherein the current
2 location of the vehicle is identified by a global
3 positioning system (GPS) measurement.--

[Add claim 99:]

1 --99. The system of claim 98 wherein each locale
2 is identified by a different GPS measurement.--

B? contd.
[Add claim 100:]

1 --100. The system of claim 99 wherein the
2 mechanism determines whether the current location of
3 the vehicle is within the predetermined range of the
4 second locale by comparing the GPS measurement
5 identifying the current location of the vehicle with
6 the GPS measurement identifying the second locale.--

[Add claim 101:]

1 --101. The method of claim 65 wherein the
2 component includes a seat.--

[Add claim 102:]

1 --102. The method of claim 65 wherein the
2 component includes a window.--

[Add claim 103:]

1 --103. The method of claim 65 wherein the
2 component includes a windshield wiper.--

[Add claim 104:]

1 --104. The method of claim 65 wherein the
2 component includes a mirror.--

[Add claim 105:]

- 1 --105. The method of claim 65 wherein the
- 2 component includes a vent.--

[Add claim 106:]

- 1 --106. The method of claim 65 wherein the
- 2 component includes an audio system component.--

[Add claim 107:]

- 1 --107. The method of claim 88 wherein the types
- 2 of entertainment include types of music.--

[Add claim 108:]

- 1 --108. The method of claim 87 wherein the
- 2 information also concerns an identity of the source.--

[Add claim 109:]

- 1 --109. The method of claim 87 wherein at least
- 2 one of the indicators indicates a status concerning
- 3 whether the at least one indicator has been selected.--

[Add claim 110:]

- 1 --110. The method of claim 109 wherein the status
- 2 is indicated by a first color if the at least one
- 3 indicator has been selected, and by a second color if
- 4 the at least one indicator has not been selected.--

[Add claim 111:]

- 1 --111. The method of claim 89 wherein the current
- 2 location of the vehicle is identified by a GPS
- 3 measurement.--

[Add claim 112:]

1 --112. The method of claim 111 wherein each
2 locale is identified by a different GPS measurement.--

[Add claim 113:]

1 --113. The method of claim 112 wherein whether
2 the current location of the vehicle is within the
3 predetermined range of the second locale is determined
4 by comparing the GPS measurement identifying the
5 current location of the vehicle with the GPS
6 measurement identifying the second locale.--

[Add claim 114:]

B⁷
contd.
1 --114. A system for use in a vehicle including a
2 plurality of components comprising:
3 a display for displaying a plurality of items each
4 representing a respective one of the components, the
5 displayed items being arranged on the display in
6 substantially the same relation to one another as the
7 components represented thereby in the vehicle; and
8 an interface for selecting at least one of the
9 items to access information concerning the selected
10 item.--

[Add claim 115:]

1 --115. The system of claim 114 wherein the
2 plurality of components are disposed in an engine
3 compartment of the vehicle.--

[Add claim 116:]

1 --116. The system of claim 115 wherein the
2 plurality of components include a radiator.--

[Add claim 117:]

1 --117. The system of claim 116 wherein the
2 radiator contains coolant, the information being about
3 a temperature of the coolant in the radiator.--

[Add claim 118:]

1 --118. The system of claim 115 wherein the
2 plurality of components include an oil compartment.--

[Add claim 119:]

1 --119. The system of claim 118 wherein the oil
2 compartment contains oil, the information being about a
3 level of the oil in the oil compartment.--

B? contd.
[Add claim 120:]

1 --120. The system of claim 114 wherein the
2 display comprises an LCD.--

[Add claim 121:]

1 --121. The system of claim 114 wherein the
2 interface includes an indicator device for selecting
3 the at least one of the items.--

[Add claim 122:]

1 --122. The system of claim 121 wherein the
2 indicator device comprises a mouse device.--

[Add claim 123:]

1 --123. The system of claim 114 wherein the
2 interface includes a touch-screen capability.--

[Add claim 124:]

1 --124. A method for use in a system in a vehicle
2 including a plurality of components, the system
3 including a display, the method comprising:
4 displaying on the display a plurality of items
5 each representing a respective one of the components,
6 the displayed items being arranged on the display in
7 substantially the same relation to one another as the
8 components represented thereby in the vehicle; and
9 selecting at least one of the items to access
10 information concerning the selected item.--

[Add claim 125:]

1 --125. The method of claim 124 wherein the
2 plurality of components are disposed in an engine
3 compartment of the vehicle.--

[Add claim 126:]

1 --126. The method of claim 125 wherein the
2 plurality of components include a radiator.--

[Add claim 127:]

1 --127. The method of claim 126 wherein the
2 radiator contains coolant, the information being about
3 a temperature of the coolant in the radiator.--

[Add claim 128:]

1 --128. The method of claim 125 wherein the
2 plurality of components include an oil compartment.--

[Add claim 129:]

- 1 --129. The method of claim 128 wherein the oil
- 2 compartment contains oil, the information being about a
- 3 level of the oil in the oil compartment.--

[Add claim 130:]

- 1 --130. A system for controlling at least one
- 2 window in a vehicle, comprising:
- 3 an interface for allowing a speed of the vehicle
- 4 to be selected; and
- 5 a controller for controlling an extent of opening
- 6 of the window based on the selected speed.--

[Add claim 131:]

- 1 --131. The system of claim 130 wherein the window
- 2 is controllably open when the selected speed is zero.--

[Add claim 132:]

- 1 --132. A method for controlling at least one
- 2 window in a vehicle comprising:
- 3 allowing a speed of the vehicle to be selected;
- 4 and
- 5 controlling an extent of opening of the window
- 6 based on the selected speed.--

[Add claim 133:]

- 1 --133. The method of claim 132 wherein the window
- 2 is controllably open when the selected speed is zero.--
